

Name and Last Name	Groupleader of your Lab	Title of your Presentation	COMMENTS
Jonas Müller	<i>Siegfried Wahl</i>	Comparison between the calculated and the measured neural transfer function	
Merve Sen	<i>Marius Ueffing</i>	ARMS2 A69S is associated with an increased level of retinal degeneration in a co-culture model for AMD	
Francois Paquet-Durand	<i>Francois Paquet-Durand</i>	Uncoupling glycolysis and oxidative phosphorylation allows for efficient and flexible energy production in rod and cone photoreceptors	
Maximilian Rutz	<i>Torsten Straßer</i>	Assessment of color vision deficiency using augmented reality retinal scan glasses	
Alexander Günter	<i>Mathias Seeliger</i>	The Mongolian gerbil as a model to study cone system physiology: an update	
Blanca Arango-Gonzalez	<i>Marius Ueffing</i>	Inhibition of valosin-containing protein (VCP) prevents retinal degeneration in P23H transgenic rats, amodel for autosomal dominant RP.	
Marita Feldkaemper	<i>Marita Feldkaemper/Frank Schaeffel</i>	Predictive power of choroidal thickness changes during luminance flicker	I am the last author, Gustav Christensen is presenting
Hurst, Jose	<i>Sven Schnichels</i>	Photobiomodulation as a potential neuroprotective therapy for oxidative stress in the Retina	
Schaeffel, Frank	<i>Schaeffel, Frank</i>	(1) Moderator of Session "Myopia: structural changes from cornea to sclera", (2) speaker Minisymposium "Illuminating myopia", title: "How focus in different spectral ranges controls emmetropization", (3) Poster "Effects of short tem exposure to red or infrared light on axial length" (presenting author)	I am on other ARVO contributions as well.
Christensen, Gustav	<i>Marita Feldkaemper</i>	Predictive power of choroidal thickness changes during luminance flicker	
Rajat Agarwala	<i>Siegfried Wahl</i>	Evaluation of a fixation-based tuning mechanism for large aperture tunable lenses in a presbyopia correction prototype	Session Title: Presbyopia, accommodation and intraocular lenses Session Date/Times: May 9, 2024 from 11:45 AM to 1:30 PM

Zhijian Zhao	<i>Christina Schwarz</i>	Imaging Platform for Autofluorescence in Retina Tissue
Sven Schnichels	<i>Sven Schnichels</i>	Supercharged unfolded proteins (SUPs) as potential topical drug delivery systems
Bowen Cao	<i>Marius Ueffing</i>	Pharmacological inhibition or genetic inactivation of ERAD effector VCP suppresses RhoA1255-associated retinal degeneration
Zhao Shiyang	<i>Simon Clark / Sylvie Julien-Schraermeyer</i>	Reduction of pathological retinal neovascularization, vessel obliteration and artery tortuosity by PEDF protein in an oxygen-induced ischemic retinopathy rat model.
Linus Emmerich	<i>Christina Schwarz</i>	Two-Photon Stimulation Efficiency with ns-Pulsed infrared Lasers
Torsten Straßer	<i>Torsten Straßer</i>	Comparison of the effects of point light vs. surface glare on the Visual Acuity Space using the VA-CAL test
Bishesh Sigdel	<i>Torsten Straßer</i>	Experimental setup to assess accommodation in non-human primates using photorefractor for evaluation of a novel wireless intraocular ciliary muscle sensor
Sven Schumayer	<i>Torsten Straßer</i>	Non-invasive recording of ciliary muscle biopotentials during accommodation using novel scleral contact lens electrode
Maximilian Rutz	<i>Torsten Strasser</i>	Assessment of color vision deficiency using augmented reality retinal scan glasses
Sophie Stürmer	<i>Haq / Zrenner</i>	Artificial vision: testing of glutamate releasing nano-pore membranes and assessment of Müller cell glutamate uptake
Arne Ohlendorf	<i>Siegfried Wahl</i>	Myopia control efficacy through Emmetropic Progression Ratio: 1-year of spectacle wear with cylindrical annular refractive elements (CARE)
Katharina Rifai	<i>Siegfried Wahl</i>	Subjective acceptance of spectacle lenses with cylindrical annular refractive elements (CARE) in Chinese children with myopia
Lucia Peiroten	<i>Haq / Zrenner</i>	Biomimetic Approach to Electrically Elicit Enhanced Artificial Vision by Using Electrode Array in Flower Layout and Saccadic-Like Electrode Activation
Lan Wang	<i>Francois. Paquet-Durand</i>	PPARs promote photoreceptor survival in the rd1 mouse model for retinitis pigmentosa
Sandra Wagner	<i>Torsten Strasser</i>	Emmetropes, but not myopes exhibit reduced retinal ON-responses in ERG after prolonged reading of standard contrast text

Jiaqi Tang (Jade)	<i>Simon J Clark</i>	Cathepsin-G accumulation in Bruch's membrane may alter complement activation through the degradation of FHRs and C3b
Yu Zhu	<i>François Paquet-Durand</i>	PKG inhibition reduces rod and cone photoreceptor cell death in the new Rho1255del mouse model for autosomal dominant retinitis pigmentosa
Julio Cesar da Costa Moura	<i>Christina Schwarz</i>	Assessing the retinal pigment epithelium with multimodal autofluorescence imaging
Xinyi He	<i>Christina Schwarz</i>	Establishing Combined Functional Assessment of Mouse Photoreceptors and Ganglion Cells in Acute Retinal Explants ARVO Foundation Travel Grant 2024
Angela Armento	<i>Marius Ueffing</i>	Complement Factor H (CFH) Y402H polymorphism alters the endoplasmic reticulum (ER) stress response in iPSC-RPE cells
